Subject: our contract from July 2nd

Loreen,
in case you have our (old) corrected version not readily available, here it is once more.
As I said in my mail this morning, the address details and the account infomation need to be in.
Then there are some minor edits, but the crucial issues patent/invention/assignment of rights have been deleted. I fully understand we have to acknowledge that PM has sponsor wants the rights to the results etc. However, since we might still have some issues to discuss, we had suggested to just delete those sections for the protocol contract and discuss them with the final study contract. Also, for example we deleted the section on export regulation for this protocol contract.

You will easily recognize all changes if you open the document with WORD (it is still in WORD correction mode). Either we could go through the document over the phone, which of those edits you are willing to accept and which still need to be discussed (even for the protocol) or you send me you annotated version of this document some time this week?
best regards
Bernhard
